

Power and Data Overview

Light Duty Teaming/Workstation

◀ **Miniport:** Miniport power/data grommets are a great power and data solution for everyday needs. A fluid pop-up feature presents connections for your daily needs. The 3”x7” product comes standard with 2 power and 2 data openings. A six foot power cord, 15 amp capability, and an adapter plate for couplers and jacks are included. Hardwired power, longer power cords, and pre-installed CAT5 cords are also available.

Miniport (Sequential Daisy Chaining): ▶ Miniport power/data is also available for daisy chaining allowing you to connect multiple tables together. Up to 8 Miniports may be connected together in a sequential fashion. The first unit has a 6’ power cord and interlink cable. Color coded interlink cables (5’) provide a “dummy proof” connection methodology that ensures a safe electrical connection for all succeeding tables. Units 2 thru 8 must be connected in a specific order. If flexibility in table order is required then see the Flip-n-Go product (more expensive but not sequential).

◀ **Assemble:** Assemble is a beautiful aluminum covered clamp on power/data solution. It clamps onto any worksurface or table and offers 2 data and 3 power outlets. A six foot power cord, 15 amp capability, and an adapter plate for couplers and jacks are included. Longer power cords and CAT5 cords are also available.

Alexander (Single-Sided): ▶ Alexander is designed for customers who want to make a statement. With its aluminum construction

Alexander offers a rich, modern aesthetic that fits any environment. Alexander comes with 2 power and 2 data outlets. A six foot power cord, 15 amp capability, and an adapter plate for couplers and jacks are included. Hardwired power, longer power cords, CAT5 cords, and additional power/data openings are also available.

◀ **Flip-n-Go:** The Flip-n-Go product is a 2 power and 2 data steel grommet with a hinged cover. Outlets are recessed below the worksurface thereby maximizing your available space. The Flip-n-Go product comes with a Convenience Outlet on the bottom of the unit which allows for additional products to be attached. The unit comes with a 6’ power cord,

a two opening CAT5 faceplate and a 15 amp, 125V circuit breaker for overload protection to protect itself and end users from abuse. Hardwired power, longer power cords, CAT5 cords, and additional data connector types are also available.

Heavy Duty Teaming/Workstation Power

▼ **Flip-n-Go (Non-sequential Daisy Chaining):** The Flip-n-Go product is available for non-sequential daisy chaining. That means that you can connect up to 20 tables together in any order. The basis of this product is a 4-wire, 2 circuit power system. Quick-connect cables let you disconnect and reconfigure tables with ease. Each grommet comes with 2 power receptacles and 2 data openings (with CAT5 face plate) for the user. On the underside of the unit is a quick-connect interface and a 6' power cable with connector. To access building power a hardwire power-in is utilized to bring power to the first user and to provide a quick-connect interface for other users. Customers can specify the Flip-n-Go with either Circuit 1 or Circuit 2 receptacles inside. Many additional data connector options are available (S-Video, etc) upon request.

Torino (Non-sequential Daisy Chaining): ► Torino power and data systems combine the power of a 4-wire, 2 circuit system with a sleek modern aesthetic that doubles as a modesty solution. Each table-based solution offers two duplex receptacles, 4 data ports, 2 quick-connect jumper cables (one to connect each duplex receptacle and one to connect to the next table), and enclosures. Building power is accessed via a starter unit that is hardwired to the building followed by up to 12 units in any order. Connector cables are internal to the inside cover which makes for a nice aesthetic and is targeted for freestanding environments with low mobility. For higher mobility the inside cover (faces the user) can be omitted for free access to quick-connect cables. Additional options are available upon request.

Conference Solutions

Alexander (Double-Sided): ► Alexander is designed for customers who want to make a statement. With its aluminum construction Alexander offers a rich, modern aesthetic that fits any environment. Alexander comes in 2 standard pop-up configurations: 4 power/4 data outlets or 6 power/6 data outlets. A six foot power cord and data plates are included. Hardwired power, longer power cords, CAT5 cords, and additional power/data openings are also available.

◀ **Interport:** Interport is a simple solution for those that want a 2 power / 2 data grommet. A low sweeping profile makes a distinctive design statement. Interport has a pop-up feature for easy access. Additionally, once connected the unit can be pushed down keeping cord heads below the worksurface. The unit comes with a 6' power cord, 15 amp capability, and an adapter kit for couplers and jacks. Interport is standard as a stand-alone unit. Ganging units as shown in the picture are available upon request.
