

RITZ TABLE

The Ritz table is designed for spaces that are always changing, from team-focused layouts to presentation formats. The modern, geometric leg design is timeless and functional, and allows tables to nest perfectly in-line. Ritz's unique flip mechanism features a slim, easy-to-operate handle that spans the length of the worksurface. The unique mechanism was designed with simplicity and durability in mind. All unnecessary parts have been removed or rethought. Unreliable cables have been replaced with secure metal-to-metal components, significantly enhancing the mechanism's durability. The top secures in both up and down positions.

Details

- Smooth and reliable flip top mechanism operates without the use of cables. The benefit? Improved long-term reliability.
- Available with rectangular top in sizes ranging from 48"-96"W and 24" or 30"D
- Flip mechanism locks in up and down position for easy transport
- Unique, geometric leg design allows tables to nest perfectly in-line
- Available in any of Enwork's standard 5 paint finishes, and 16 laminates
- Pairs well with Enwork's Universal Pivoting Modesty panels
- Standard with 4 locking casters
- Dual-surface, polyurethane casters allow for smooth and quick movement
