Torque Guide:
- M6 Screw’s max torque = 6nm
- M10 Screw’s max torque = 6nm
- M8 Screw’s max torque = 6nm
- Tapping screws hand tightening only
**Zero Setting:**

When you use the height-adjustable frame for the first time or you wish to use a configured control unit on another identical electric height-adjustable frame, you must reset the lowest desktop position to the minimum height.

- Press ▼ button and keep pressing it until the desktop has reached the lowest position (programmed desktop position).
- Press ▼ button again and keep pressing it. After about 5 seconds, the desktop will slowly move further down until it reaches the absolutely lowest desktop position possible.
- Release ▼ button. The electric height-adjustable frame can now be used.
