TI0023 Laminate/Fabric Privacy/Modesty Installation Instructions
1) Parts and Fasteners Included

- # 10 x .875" Phillips Wood Screw (Screw 1)
- ¼"-20 x 3/8" Low Profile Socket Head Screw
- EM-1332 L-Bracket
- ¼"-20 threaded insert w/out flange **

[Laminate Version Only **]

Parts and Fasteners Needed

- Drill/Driver
- 1/8" Hex Bit
- #2 Square Bit
- 6mm Hex Bit **
For laminate screens, use the drill and 6mm Hex bit to install required threaded inserts. DO NOT OVER TIGHTEN. Inserts should sit flush or just inset of laminate surface.
1) Using the drill and 1/8” Hex bit, install ¼-20 x 3/8” Low Profile Socket Head Screws and EM-1332 as shown below. Be sure the slot of EM-1332 is facing the top of the screen.
2) After brackets are installed, hold the screen up to the back of the work surface with the brackets flush to the bottom of the work surface.
3) Two Installation Options:

A. Install the screen flush to the edge of the work surface.
B. Install the screen ½” offset from the edge of the work surface.
4) If ½” offset on the back of the work surface is desired, align attachment brackets to the edge of the work surface as shown below. Slot should just disappear behind the edge.
5) With screen still held in place, attach to bottom of work surface using #10 x .875” Phillips Wood Screws, drill, and #2 Square bit.
